Your intent.
In motion.

A phone agent that reads the moment, finds the next step, and checks where it lands.

YOU LEAD. TANGO FINDS THE STEPS.

01

Attention becomes movement.

The satisfying moment in a puzzle is when the next move becomes clear. That is the feeling Tango should bring to a phone.

01 / THE PUZZLE

Relationships make a move legible. Tango balances two symbols, uses same/opposite clues, and constrains what can sit next to what.

02 / THE PARTNERSHIP

One person leads; another responds. The useful metaphor is attention, timing, and adjustment. Direction stays with the person.

03 / THE AGENT

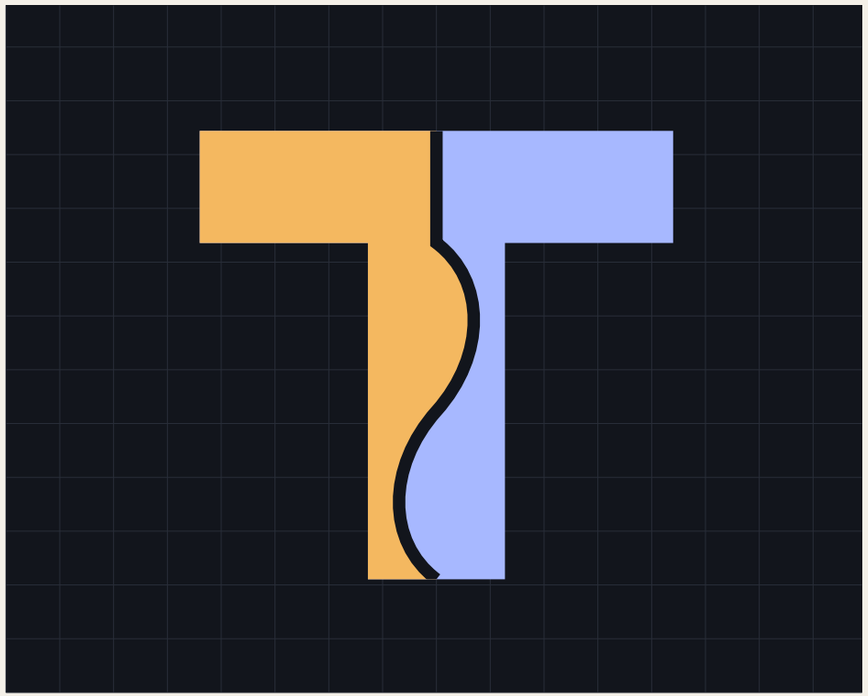
Your intention meets the visible screen. Tango observes, chooses a step, acts, and checks what changed before continuing.

The next justified move.

Progress comes from paying attention to both the goal and the moment.

Puzzle rules: LinkedIn Help / a6861672

Two signals. One move.



128-UNIT CONSTRUCTION / 2-UNIT SEAM

The warm half

Your intention: the direction that starts the movement.

The lunar half

The response: a step shaped by what the phone shows.

The shared seam

An S-shaped passage for rhythm, feedback, and course correction.

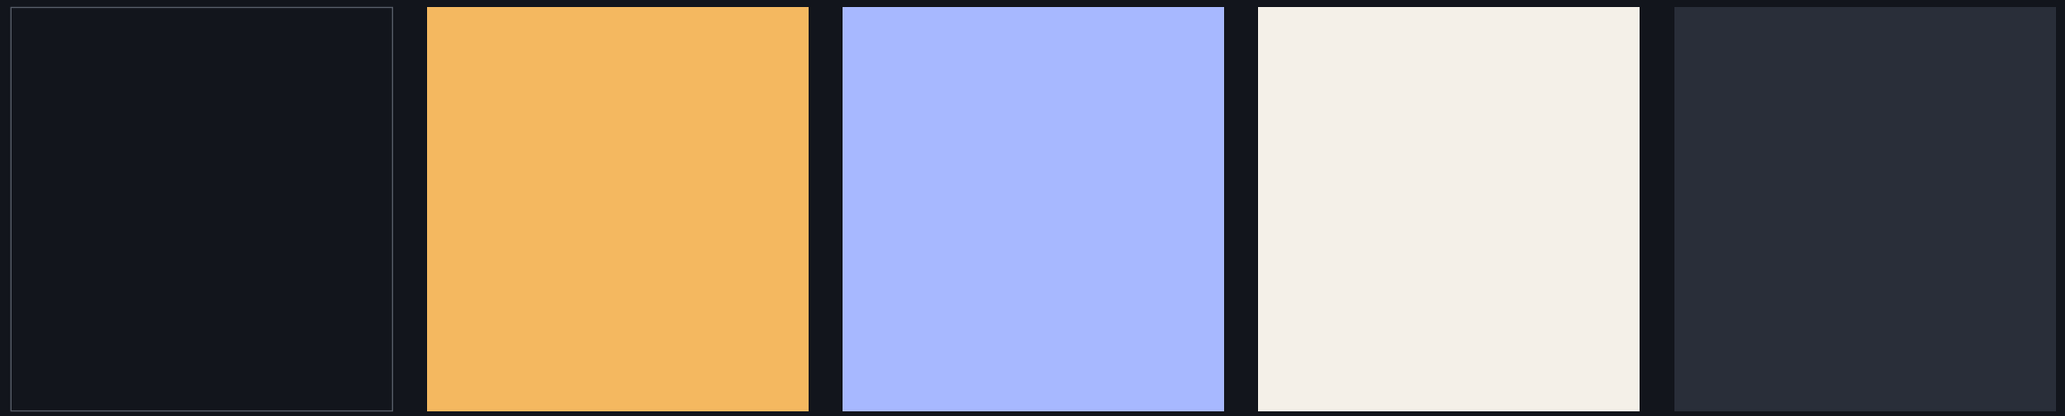
PRIMARY

ONE COLOR / LIGHT

ONE COLOR / DARK

Warm intent. Cool response.

A night palette with two bright signals. Warm paper keeps long-form communication human.



NIGHT INK
#12151C
Foundation

SOLAR AMBER
#F4B860
Intent / primary action

LUNAR BLUE
#A7B8FF
Response / observation

WARM PAPER
#F4F0E8
Content / light surface

GRAPHITE
#292E39
Supporting surface

Keep most surfaces quiet. Use the two signal colors at meaningful moments, with text or shape labels so color never carries the state alone.

Clear enough to act on.

Rubik

Headlines and product language. Geometric structure with a little softness. Regular for body copy, bold for decisions.

IBM Plex Mono

Status, timestamps, technical labels. Its measured rhythm supports the grid without turning every sentence into code.

THE VOICE: ATTENTIVE, SPECIFIC, CALM.

LISTENING

What should we do?

OBSERVING

Checking what is on screen.

UNCERTAIN

There are two Alexes. Which one?

PAUSED

Paused. Continue when you are ready.

Say what happened. Ask one useful question. Keep the person in charge.

Observe. Act. Listen again.

A two-beat cadence that changes with evidence. The pause is part of the choreography.

01

OBSERVE

A cool response appears.

02

ACT

A warm step moves forward.

03

VERIFY

The screen is read again.

04

CONTINUE

Only then, the next step.

MOTION SPECIFICATION

160 ms response / 240 ms transition / 400 ms complete cycle. Offset the two halves by one beat; bring them back into alignment. Pause settles immediately. Reduced motion uses static labeled states.

An identity with a job to do.

Use the same logic in every touchpoint: a clear goal, a visible response, an easy way to lead again.

At the app icon

The paired T stays recognizable before the story is explained.

During a task

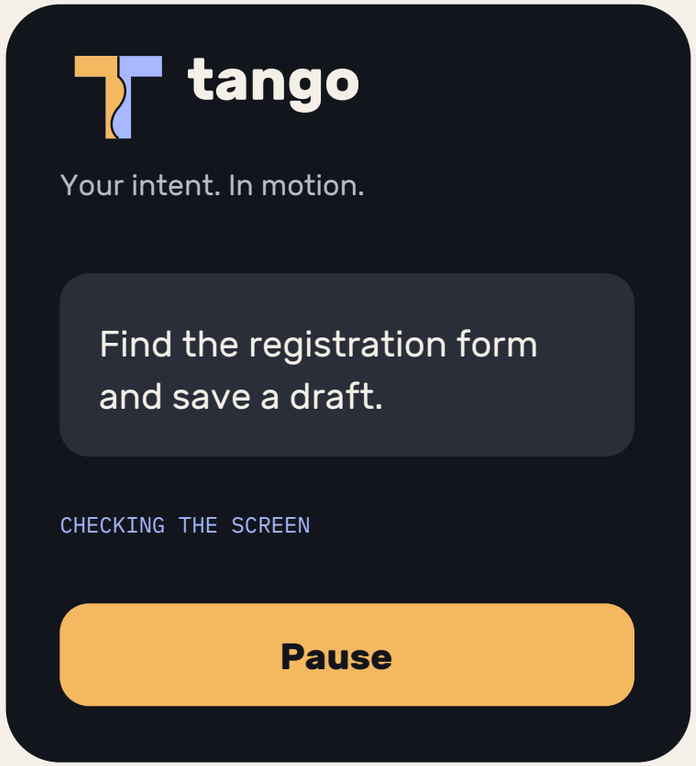
Cool indicates observation; warm indicates action. State labels always remain visible.

When something changes

Explain the new situation and the next step in concrete language.

When the user interrupts

Treat pause and correction as normal parts of working together.



ILLUSTRATIVE UI / PROPOSED TREATMENT

One idea, carried all the way.

The system should feel like a capable partner: precise about the next move, responsive when the situation changes.

USE RULES

Keep the mark flat; use the supplied colors or one-color variants.

Keep clear space of 18 units around the 128-unit mark.

Use at least 32 px for the primary symbol and 120 px for a wordmark.

Use the curves and grid as supporting rhythm, never as a busy backdrop.

Keep claims grounded in what the product observed and completed.

IN THIS KIT

Vector marks / outlined wordmarks / app icon / palette tokens / licensed fonts / voice guide / motion demo

Original identity inspired by the puzzle; the meaning here is a proposed brand metaphor.
